ACADEMIC PROJECTS

Grow Smart (FYP)

Grow Smart is an exciting and valuable project that seeks to empower parents with the knowledge and tools necessary to promote their child's growth and development. Through collaboration and community-building, this platform will provide a supportive and engaging environment for parents to learn, grow, and thrive. Technology Used NODE JS, EXPRESS JS, MONGO DB, REACT JS. My role in this project is developing frontend using Reactjs.

Dino Automation AI

This Project was developed using python to automate dino offline game on google using concepts of Ai and d image processing.

COVID Management System

The mainstream of this project was to keep track of vaccinated and non-vaccinated patients. Patients and Doctors have different portals in which they perform their respective operations. This project was developed in csharp and SQL,

Bot System Website

Bot system web based project to train bot to answer chat replies when customer ask questions related to site this project was developed using mern stack. **Daira App**

Daira app is an event based app where people can register for the event via an online portal this was developed on android studio using firebase database.
